

The modular pieces are grouped in various combinations to create a sectional. Connectors are located at the bottom frame of each piece: a prong on one side and an alligator ratchet on the opposite side. (See below).

Caution:

- * Keep fingers clear of mechanism when connecting or disconnecting pieces.
- * Do not attempt to pry open the alligator ratchet as damage may occur. To properly disconnect pieces, follow instructions below.

To connect sectional pieces:

- * Connection by two people is strongly recommended.
- * Position modular pieces in desired arrangement.
- * Slide the prong on one piece into the alligator teeth on the adjoining piece until it locks in place.

(See illustration below)

To disconnect sectional pieces:

- * Disconnection by two people is strongly recommended.
- * Carefully lift the piece with the prong straight up and out from the alligator teeth of the adjoining piece. (See illustration below). For multiple adjoining pieces, begin disconnection with end piece.
